

How to cut out your

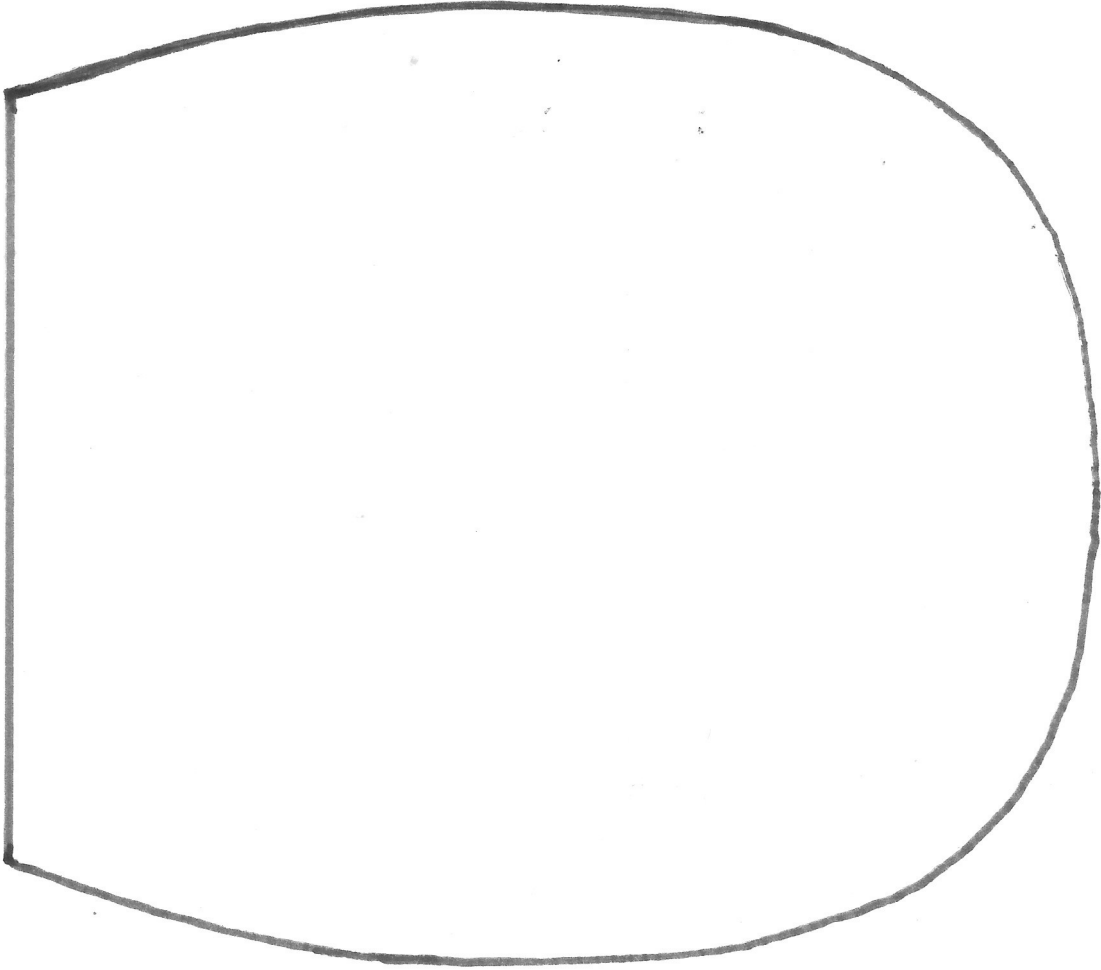

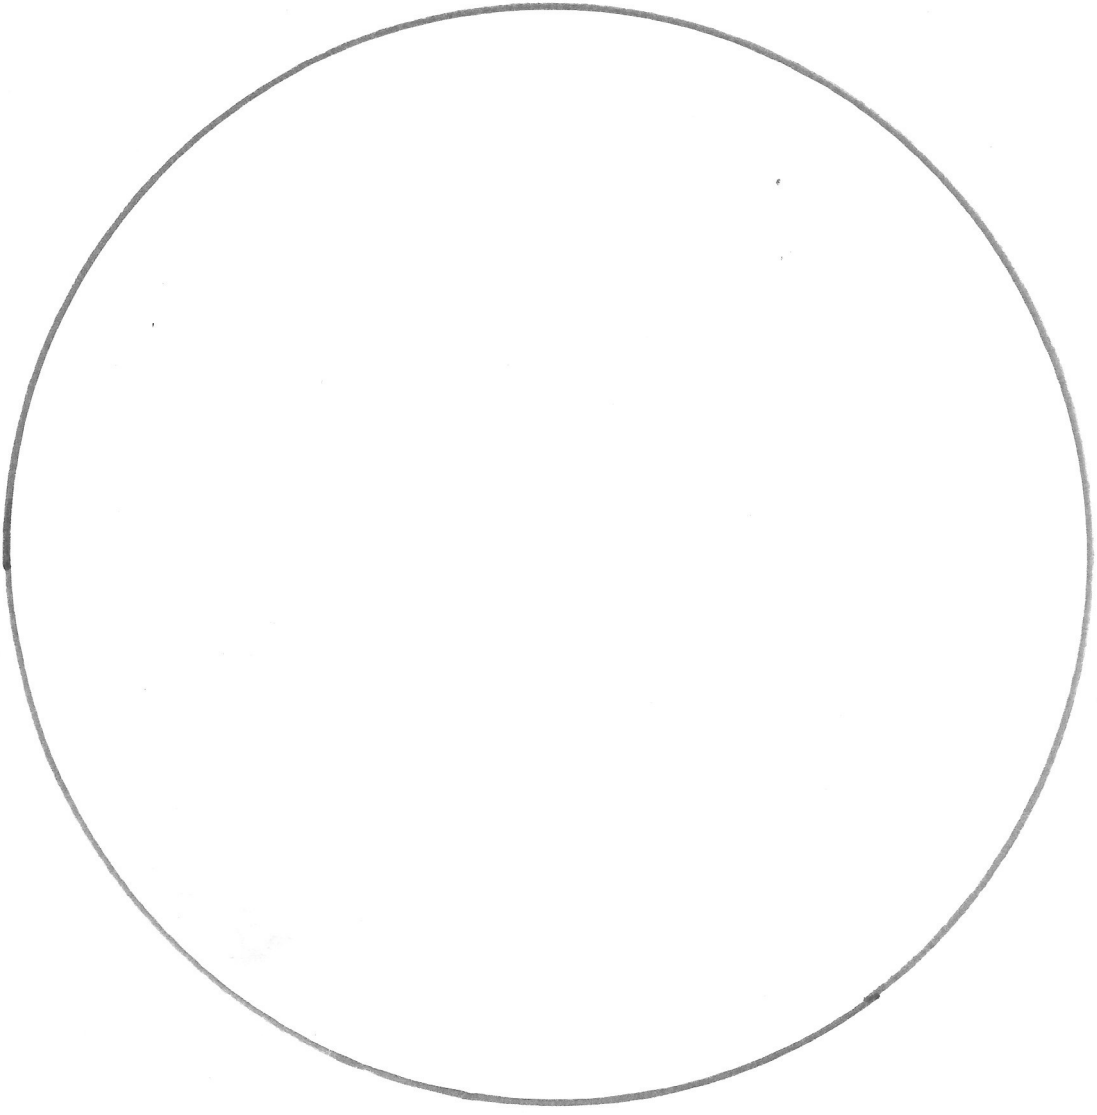

Pumpkin Papercut Stencils

Fold the paper down the purple middle line. Cut out the three round pumpkin shapes. First! cut out the solid lines drawn on each shape, which can be cut from the folded middle line (pumpkins nose + mouth). Secondly fold the pumpkins on the dotted lines - and cut out the solid black lines whilst folded (pumpkins eyes). Unfold your stencil and use to cut out more paper shapes. The thinner your paper the best result, as card can be hard to bend! NOTE: Aim to cut away the black lines when cutting - if you cut inside them your cut away areas might be too small!
